

# IW-100GX-N

eXtreme Power 11n 2.4Ghz 1x1  
In-Wall PoE Access Point (800mW)

With CenOS 3.0 Software

**EX**TREME<sup>®</sup>  
POWER

## ***Hotel Wireless Total Solution***

### IW-100GX-N

Operation Modes	Router AP with WDS/AP with WDS/WDS/Client Bridge + Universal Repeater/WISP/CPE Repeater+AP Mode
Output Power	800mW
Wi-Fi Standards	IEEE 802.11n b/g
Multiple-ESSID	x8
Tag VLAN	Supports 1 VLAN Tag per SSID
IAAP Roaming	✓
Antenna	1x1 Built-in Omnidirectional Antenna
Management	Managable by CenOS 3.0 and CWMS
Ethernet Configuration	RJ-45 Ethernet Port x 2
Telephone Configuration	RJ-11 Line-In x 1 RJ-11 Line-Out x1
Input Power Requirement	803.3af 48V PoE Ethernet Interface Power In
Power Supply	PoE Device (Optional Purchase)
Form Factor	In Wall Installation: US Type and EU Type Faceplate Supports Desktop Stand & Wall/Ceiling Mounting

■ Cerio Access Point Support Thin/ Fat both of AP structure

WM-100GX-N  
Centralized control all indoor APs

## Cerio Wireless Management Software ( CWMS ) Centralized APs management software– PC Base

Control AP Group Management  
Support up to 500 Access Point / Windows base

**CWMS only supports Cerio's CenOS 3.0 core**

## Hardware:

4. Faceplate Types

## Software:

1. CenOS Version Diagram
2. Advanced Support
3. Competitive Points of Emphasis
4. Cerio CenOS 3.0 Software UI Overview

- IW-100GX-N (Built-in 2.4 GHz) 1x1 Smart Omnidirectional antennas
- Two 10/100 Fast Ethernet Ports
- The Ethernet port supports Link-On and Cable Length Power Saving and Link-Down Power Saving when PoE is not available
- 400Mhz high level base CPU
- AP Point to Multi-Point Application Support

## 800mW eXtreme High Power Wireless Capability

- Enables connection to Wireless In Networks for service provider deploying last mile services
- Powerful wireless 11n speed of up to 150Mbps
- 1x1 Built-in 2.4 GHz Smart Omni-directional antennas
- Allows for easy structuring of devices through 802.3af PoE power /data capabilities supplied through CAT5 Ethernet cabling
- LED on / off control by UI setting

## Cerrio IW-100GX-N Bundles CenOS 3.0 Software Overview

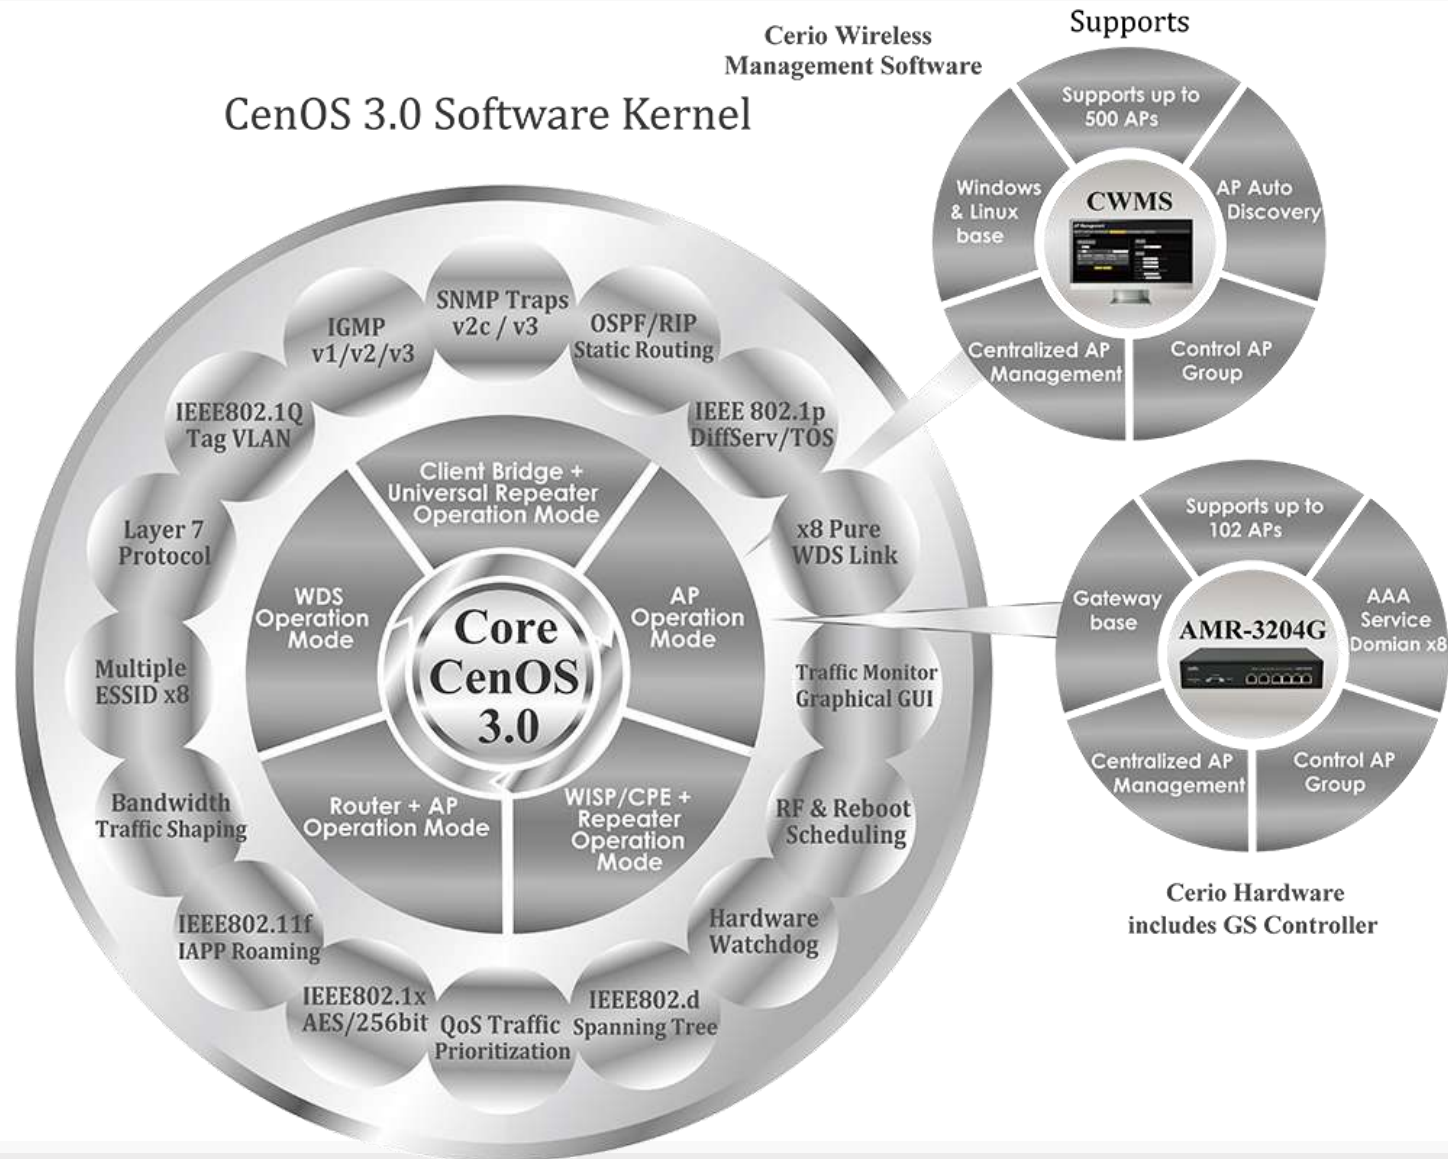

Only Cerio's special model supports Router AP mode

## CenOS 3.0 Software Kernel

## 8 Multiple-ESSID Support

- Allows for network segmentation by administrators

## Integration

- Utilizes IGMP v1/v2/v3 Snooping Function
- Includes Web Support management
- Integrated SNMP (Simple Network Management Protocol) MIB-II
- Supports Hardware chipset base Watch Time Dog Function

## Quality of Service (QoS)

- For bandwidth management and Traffic Prioritization

## Bundles Software Interface

- Bundles Cerio CenOS3.0 allows administrators to easily configure, monitor, and update IW-100GX-N settings and functions.

## Watch Time Dog Function

The Cerio IW-100GX-N is equipped with Watch Time Dog capabilities that allows for increased system stability. The Watch Time Dog function smartly reboots network systems after a set time period where the system is unresponsive. This allows for network reliability and minimizes the need for on-site IT staff maintenance.

## Advanced Business Features

8 SSIDs allows for more complex network configuration, allowing businesses to separate and organize their network into 8 virtual networks. SNMP V3 standards provides more secure network access to devices, allowing for greater network safety.

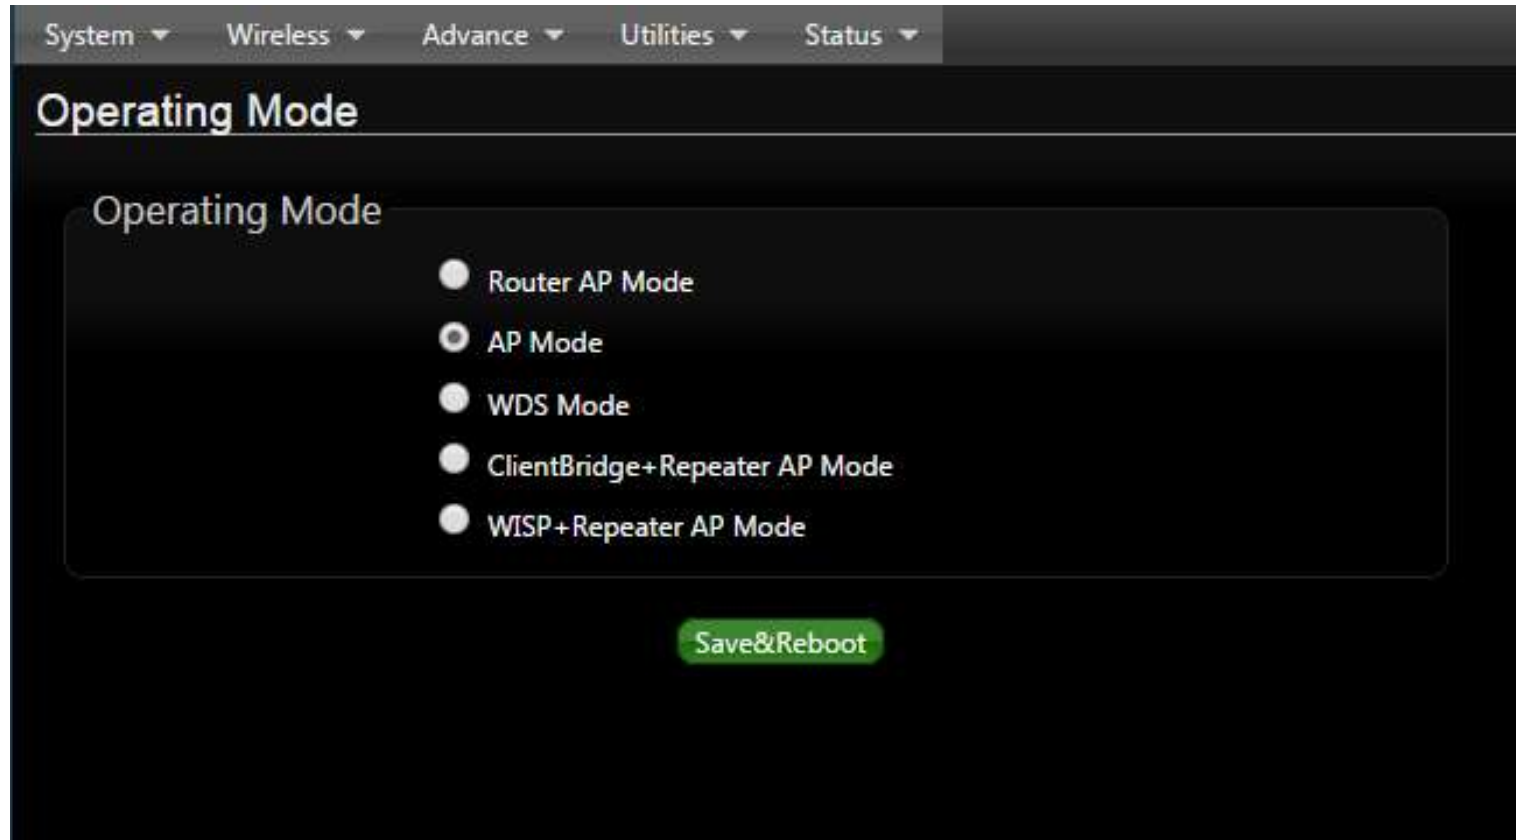

## IW-100GX-N Spanning Tree Protocol

The Spanning Tree Network Protocol provides **loop free technology**, blocking any loops in the network infrastructure

5 Operation Modes : Router AP with WDS mode / Pure AP with WDS Mode / Pure WDS mode / Client Bridge + Universal Repeater Mode and WISP / CPE Repeater +AP mode

Control Hardware LED Light On/Off Settings.

Mainly for hotel purposes, LED Control can remove blinking LED lights for tenant comfort.

Create and manage up to **8 ESSIDs** to segment you network. This allows administrators to **separate traffic** within VLANs, allowing for more organized network construction.

## QoS Setup

### Bandwidth Control

Service:  Enable  Disable

Mode:  Total Bandwidth  Per Rule Bandwidth

Upload:  kbps

Download:  kbps

Save Clear

### Per Rule

Comment:

Type: IP Address ▾

IP:

Upload:  kbps

Download:  kbps

Save Clear

### QoS List

#	Comment	Rule	Bandwidth(U/D)	Action
No items in the list!				

Allows for bandwidth control which permits Administrators to allocate bandwidth to parties as they see fit

Also allows for Rule setting customization, where admins can enact QoS Rules to specific individual IP Addresses, Segments, MAC addressed, and even Ports.

### IP Filter Setup

**IP Rules**

Source Address/Mask:

Source Port:

Destination Address/Mask:

Destination Port:

In/Out:  In  Out

Protocol:  ALL  TCP  UDP  ICMP

Listen:  Yes  No

Policy:  Deny  Pass

Interface: ALL ▾

Schedule: Always Run ▾

In Router AP mode , the IP and MAC Filtering offers a greater sense of control within a network. This control over network Access allows for Administrators to create a more secure network

In Pure AP Mode Admins use MAC Filtering to also control traffic within their network.

### MAC Filter Setup

**MAC Rules**

Action: Disabled ▾

MAC Address:

Schedule: Always Run ▾

**MAC Filter List**

#	MAC Address	Schedule	Actions	#	MAC Address	Schedule	Actions

**Time Policy Setup**

Policy 3

Policy: Policy 3

Schedule Rule:  On Schedule  Out of Schedule

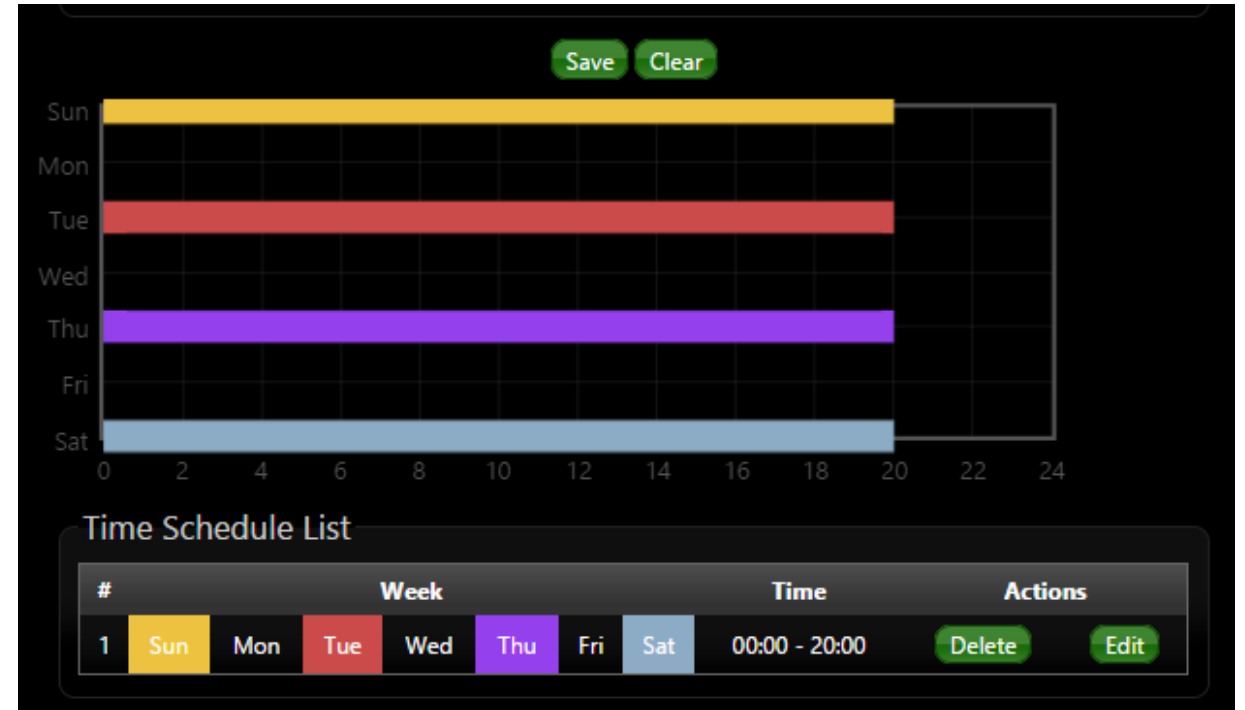

---

**Time Schedule**

Day of Week:  Sun  Mon  Tue  Wed  Thu  Fri  Sat

Start From: 00 : 00

End At: 20 : 00

IW-100GX-N's CenOS 3.0 Time Policy function allows **for management of usage time** within a network. CenOS 3.0's easy to use interface allows for simple configuration of Day/Time restrictions that Admins can place on users within the network.

Administrators can activate the CenOS 3.0 Auto Reboot function that effectively reboots the network system routinely based on admin settings. This enables better system reliability and a lower likelihood of crashes. It also reduces the need for constant on-site system maintenance in case of system crashes.

### Ping Watchdog

Service:  Enable  Disable

IP Address To Ping:

Ping Interval:  Seconds

Startup Delay:  Seconds

Failure Count To Reboot:

### Auto Reboot

Type:

Time:  :

Provides Traffic Monitor and Graphical GUI Status Interface.

IW-100GX-N's CenOS 3.0 is a valuable software for organizations deploy and manage Cerio products in a variety of challenging networking environments.

By utilizing Cerio CenOS 3.0 with Cerio's IW-100GX-N, networks can be easily configured, controlled and monitored from one central location. Features include network segmentation (Multiple SSID), Parental and Time Policy Control, and IP/MAC filtering for enhanced network security.

The IW-100GX-N management software delivers a robust suite of tools for IT managers and network administrators to conveniently deploy, manage and maintain wireless networks.
